

FLEET HEALTH MONITORING

CONNECTED SOLUTIONS

HELPING FOCUS ON YOUR TRUCKS **THAT NEED IT MOST**

Maintaining a health fleet can be complex. Fleet Health Monitoring from International Truck helps make it just a little easier, by analyzing remote fault code data and reporting on the vehicles in your fleet most in need of service and repairs.

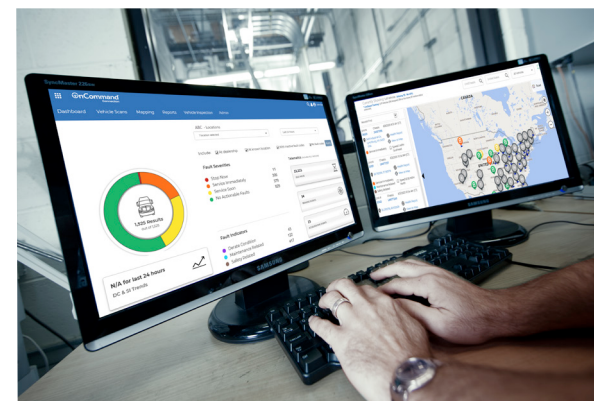

SORTING THROUGH YOUR CONNECTED DATA FOR WHAT **YOU NEED NOW**

Powered by OnCommand® Connection, Fleet Health Monitoring analyzes your fleet's connected data to pinpoint faults and fault combinations that are most likely to put trucks at risk of a roadside breakdown, so you can put your attention where it's needed most.

Key Features:

- Weekly reports delivered by email and / or online portal
- Focus on key areas which are known to cause unexpected downtime when not addressed: Coolant, DPF, DEF, and Oil issues
- All-makes / models / engines compatible*
- Integrates data from 28+ telematics service providers
- Links to OnCommand Connection for detailed health reports and Fault Code Action Plans that provide detailed guidance to address the issues
